IEEE Potentials Theme Issue

September/October 2021

Lead Editors: Cátia Bandejas—catiafmb@ieee.org

Jacquelyn Adams—jacquelyn.r.adams@gmail.com

IEEE Potentials is the IEEE's global magazine for students, with a circulation of 140,000. The annual theme issue of Careers and Graduate Education will be focused on a prominent effect of the COVID-19 pandemic: the need for advancing remote work, education, and career development. Authors are encouraged to discuss technology for remote work and education and how their workplaces or classrooms adapted to the constraints posed by social distancing. Topics include but are not limited to:

- Technologies for remote work and education
- Long-distance laboratories
- Platforms for continuous education
- Changes in job market dynamics
- Conducting grad school research in a remote environment
- Time and project management
- Organization of online events
- Job interviewing and job onboarding remotely
- Various IEEE resources for grad students and young professionals

Submission of Papers: Prospective authors are invited to submit articles of up to 4,000 words. Articles should be aimed at a student audience and should not include original research. *IEEE Potentials* style requires no abstract, no citations within the main text, and minimal equations but the use of relevant, captioned illustrations and photographs is encouraged. For more information, refer to the magazine's information for authors. Articles for consideration should be uploaded to mc.manuscriptcentral.com/pot-ieee.
